

CAM ARM SETS

PT offers a variety of cam arm sets on cam and groove fittings. Each cam arm is designed for specific industry usage to create a smooth camming action that features strength, endurance and security.

For instance, STA-LOK® couplers and STA-LOK II® locking cam arms are the solution to all industry's hose fittings for keeping a secure and safe seal. STA-LOK® is a positive locking feature that comes with carbon steel or stainless steel hitch pin clips. STA-LOK® couplers and STA-LOK II® cam arms meet the [Coast Guard ASTM 1122-87](#).

Proper use of STA-LOK® and STA-LOK II® mechanisms can help prevent spills by keeping the cam arms from opening under adverse conditions, such as high vibrations, pulsing, wear and corrosive hazardous materials.

PT STA-LOK II® Paddle Handles (SLSPX, SLBPX) are made for workers using gloves in cold weather or hot weather applications.

FEATURES OF STA-LOK® AND STA-LOK II®:

- Pins, rings and the lock plate are 300 series Stainless Steel
- Available for coupling sizes: 1" through 4"

STA-LOCK II (Stainless Steel)

PX PADDLE HANDLE (Brass)

CAM SETS

PT cam arms come in materials such as Brass (HB), 304 Stainless Steel (HBS), and 316 Stainless Steel (HS). Cam arms and pins are available in exotic metals such as Hastelloy® and Monel® upon request.

The item numbers listed below are for the cam sets/arms only, for the full item number featuring the body fitting option, please contact your local PT Representative today or go online for our digital catalog www.ptcoupling.com.

Upon cam arm replacement, PT recommends replacing the entire fitting due to long-term wear for the best production results.
